DIFFERENCES ENTRE LA REGLEMENTATION CONGOLAISE ET L'ANNEXE 2 DE L'OACI

En matière des règles de l'air, la réglementation applicable sur le territoire du Congo est conforme dans le fond aux SARPs qui font l'objet de l'Annexe 02 à la convention de Chicago à l'exception des différences spécifiées ci-dessous :

*In the field of the rules of the air, the enforced regulation in the republic of Congo is compliant with the SARPs related to the annex 02 of the Chicago convention excepted those cited below:*

| Disposition de l'Annexe<br><i>Provision of the annex</i>   | Catégorie de la différence<br><i>Difference category</i> | Différence<br><i>Difference</i>   | Observations<br><i>Remarks</i>  |
|--|--|---|---|
| <b>Chapitre 2/ Chapter 2</b><br>Domaine d'application des règles de l'air / <i>Air rules application scope</i> |  |   |   |
| 2.4  | B  | <p><b>Dispositions supplémentaires :</b><br/>           Sous le titre "Autorité du commandant de bord" la réglementation comporte, outre les dispositions figurant au paragraphe 2.4 de l'Annexe 2, les dispositions suivantes :</p> <ul style="list-style-type: none"> <li>- Le commandant de bord d'un aéronef sera responsable de l'application des autorisations et instructions de contrôle reçues d'un organisme de la circulation aérienne.</li> <li>- Si une instruction du contrôle de la circulation aérienne n'est pas jugée satisfaisante par le commandant de bord d'un aéronef celui-ci peut demander une modification à cette instruction, demande à laquelle il sera, dans la mesure du possible, donné suite.</li> <li>- Les autorisations et instructions du contrôle de la circulation aérienne ne peuvent servir de prétexte à un commandant de bord pour enfreindre un règlement quelconque établi.</li> </ul> <p><b>Additional arrangements:</b><br/> <i>Under the title " Authority of the Captain ", the regulation includes, besides the arrangements mentioned in the paragraph 2.4 of ANNEX 2, the following arrangements :</i></p> <ul style="list-style-type: none"> <li>- <i>The Captain of an aircraft will be responsible for the application of clearances and control instructions received from an air traffic organism.</i></li> <li>- <i>If an instruction of air traffic control is not considered as correct by the Captain of an aircraft, this one can require a modification to this instruction, request to which it will be given effect as far as possible.</i></li> <li>- <i>The clearances and instructions of air traffic control cannot be used as pretext to the Captain to act contrary to some established regulation.</i></li> </ul> | <p style="text-align: center;">Insertion dans le paragraphe 2.4<br/>           Autorité du pilote Commandant de bord d'un aéronef du paragraphe ci-contre</p> <p style="text-align: center;">Insertion into paragraph 2.4<br/>           "Authority of pilot-in-command of an aircraft" of opposite paragraph</p>             |

Les autorisations, les instructions et les renseignements donnés par les tours de contrôle des aérodromes sont destinés dans toute la mesure du possible à aider les commandants de bord à cette fin.<br><i>Clearances issued by air traffic control units do not provide the separation between special VFR flights within aerodromes of the Republic of the Congo.</i><br><i>Supplementary added text: It is the responsibility of the pilot in command to avoid collisions with other aircrafts. Clearances, instructions and information provided by aerodrome control towers are intended as far as possible to pilots in command for that purpose.</i> | Modification du §3.3.4 –<br>Fonctionnement du service de contrôle de la circulation aérienne, comme suit<br><br>Modification of §3.3.4 – Operation of air traffic control service, as follow |

DIFFERENCES ENTRE LA REGLEMENTATION CONGOLAISE ET L'ANNEXE 14 DE L'OACI

En matière de conception, d'exploitation technique et de certification des aérodromes et hélistations, la réglementation applicable sur le territoire du Congo est conforme dans le fond, aux standards et pratiques recommandées qui font l'objet de l'annexe 14 à la Convention de Chicago à l'exception des différences spécifiées ci-dessous :

*In the field of design, technical exploitation and aerodromes and heliport certification, the enforced regulation in the republic of Congo is compliant with the SARPs related to the annex 14 of the Chicago convention excepted those cited below:*

| Disposition de l'Annexe       | Catégorie de la différence | Différence  | Observations  |

**CONTINGENCY PLAN FOR OUAGADOUGOU UTA**

**PART I: LEVEL 2 CONTINGENCY PLAN (REQUIRING INTERVENTION OF ADJACENT FIR)**

**1. OBJECTIVES**

- 1.1 This contingency plan contains procedures to ensure the provision of air navigation services in the event of partial or total disruption of Air Traffic Services (ATS) within the OUAGADOUGOU Upper Traffic Area and is in accordance with ICAO Annex 11-Air Traffic Services Chapter 2, paragraph 2.32, and Attachment C, and document 4444 ATM- PANS (Chapter 15.8 and chapter 16.6).
- 1.2 This Contingency Plan is designed to accommodate the flow of international air traffic with a minimum of disturbance for aircraft transiting the airspace under the responsibility of OUAGADOUGOU Area Control Center (ACC). Routes and flight levels are limited.

**2. STATES AND FIRS AFFECTED**

In the event that the Civil Aviation Authority of BURKINA FASO (ANAC) activates this Contingency Plan, the adjacent ATS Units ABIDJAN ACC, NIAMEY ACC, BAMAKO ACC and ACCRA ACC, will be notified in accordance with the Letters of Agreement (LOA) Or Memorandum of Understanding (MOU) established between them. The adjacent ATS UNITS directly affected by this Contingency Plan are as follows:

| STATE         | FIR        | ATS UNIT        |
|---------------|------------|-----------------|
| Niger         | Niamey FIR | Niamey ACC      |
| Burkina Faso  | Niamey FIR | Ouagadougou ACC |
| Cote d'Ivoire | Dakar FIR  | Abidjan ACC     |
| Mali          | Dakar FIR  | Bamako ACC      |
| Ghana         | Accra FIR  | Accra ACC       |

- 2.1 Contact details of the civil aviation authorities and organizations concerned are contained in PARAGRAPH 15.1 below.

**3. MANAGEMENT OF THE CONTINGENCY PLAN**

- 3.1 The contingency measures set out in the first part of this Plan are applicable in cases of foreseeable events is for level 2.
- 3.2 The following procedures have been put in place to ensure that the management of the Contingency Plan provides for international flights to proceed in a safe and orderly fashion through OUAGADOUGOU UTA.

**CENTRAL COORDINATING COMMITTEE**

- 3.3 The Central Coordinating Committee (CCC) function shall be to oversee the implementation of the Contingency Plan and in the event that the Air Traffic Services (ATS) in OUAGADOUGOU UTA is disrupted for an extended period, make arrangements for and facilitate the temporary relocation of the Air Traffic Services to NIAMEY ACC and the restoration of Air Traffic Services in OUAGADOUGOU UTA.

The Central Coordinating Committee comprises representation from the following:

- 1) BURKINA FASO CIVIL AVIATION AUTHORITY (ANAC)
- 2) BURKINA FASO ANSP
- 3) OTHER RELEVANT AUTHORITIES.

Contact details of its members are provided in paragraph 15.1, 15.2 and 15.3 below.

**ATM OPERATIONAL CONTINGENCY GROUP**

- 3.4 The ATM Operational Contingency Group (AOCG) will be convened by the CCC with a primary responsibility to oversee the day to day operations under the contingency arrangements, and coordinate operational ATS activities, 24 hours a day, throughout the contingency period in coordination with the WACAF Contingency Coordination Team and adjacent FIRs. The AOCG will include any necessary specialist personnel from the following disciplines:

- \* Air Traffic Control Services (ATS)
- \* Aeronautical Telecommunication (COM)
- \* Aeronautical Meteorology (MET)
- \* Aeronautical Information Services (AIS)
- \* ATS equipment maintenance service provider.

Contact details of its members are provided in paragraph 15.2 below.

**4. AIR TRAFFIC MANAGEMENT AND CONTINGENCY PROCEDURES**

**4.1 Air Traffic Services Responsibilities**

- 4.1.1 Tactical ATC considerations during periods of over-loading may require re-assignment of routes or portions thereof.
- 4.1.2 Alternative routes are designed to maximize existing ATS routes structures and communications, navigation and surveillance services.
- 4.1.3 In the event that ATS cannot be provided within OUAGADOUGOU UTA, ASECNA or ICAO shall publish not less than 48 hours before, if practicable, the corresponding NOTAM indicating the following:

- a) Time and date of the beginning of the contingency measures;
- b) Airspace available for landing and over flying traffic and airspace to be avoided;
- c) Details of the facilities and services available or not available and any limits on ATS provision (e.g. ACC, APP, TWR and FIS), including an expected date of restoration of services if available;
- d) Information on the provisions made for alternative services;
- e) ATS contingency routes;
- f) Procedures to be followed by neighboring ATS units;
- g) Procedures to be followed by pilots;
- h) Any other details with respect to the disruption and actions being taken that aircraft operators may find useful.

4.1.4 In the event that the BURKINA FASO Civil Aviation Authority (ANAC) is unable to issue the NOTAM, ASECNA or ICAO will take action to issue the NOTAM of contingency measures upon notification by BURKINA FASO Civil Aviation Authority.

#### 4.2 Separation

Separation criteria shall be applied in accordance with the Procedures for Air Navigation Services- Air Traffic Management (Doc 4444) and the Regional Supplementary Procedures (Doc7030).

Longitudinal separation of fifteen (15) minutes, for aircraft maintaining the same cruising flight level.

#### 4.3 Level restriction

Where possible, aircraft on long haul international flights shall be given priority with respect to cruising levels.

#### 4.4 Airspace Classifications

Airspace classification will not be changed. (Depending on the degree of disruption, airspace classifications may be changed to reflect the reduced level of services. Changes to airspace classification will be notified by the same NOTAM which will activate this plan).

#### 4.5 Aircraft position reporting

4.5.1 The primary means of communication will be by VHF or HF radio. (Except for aircraft operating Automatic Dependent Surveillance – Contract (ADS-C and Controller-Pilot Data Link Communications (CPDLC) systems. When CPDLC has been authorized for use by the relevant ATC authority this will become the primary means of communication, with HF as secondary. ADS-C shall replace any requirement for voice position reporting to ATC for aircraft so equipped, and in this case, CPDLC or HF will be the secondary means of communication).

Traffic Information Broadcast by Aircraft (TIBA) procedures shall apply in OUAGADOUGOU UTA during periods of contingency.

4.5.2 TIBA frequencies shall be as follows:  
AFI REGION – 126.9 MHz

#### 4.6 Other measures

Other measures related to the disruption of air traffic services and the implementation of the contingency scheme within the OUAGADOUGOU UTA may be taken as follows:

- \* Suspension of all VFR Operations;
- \* Delay or suspension of general aviation IFR operations; and;
- \* Delay or suspension of commercial IFR operations

#### 4.7 Procedures for ATS Units

The ATS units providing Air traffic control services will follow their unit emergency operating procedures and activate the appropriate level of contingency procedures in line with this plan.

- a) ATC will inform pilots of the emergency condition and advise if it is likely that the ATS will be suspended and transmit on the radio frequency in use providing pilots with alternate means of communication;
- b) During the period the contingency procedures are in effect, flight plan and other aircraft movement messages must continue to be transmitted by operators to OUAGADOUGOU ACC via the AFTN/AMHS using normal procedures;
- c) On notification by the BURKINA FASO CIVIL AVIATION AUTHORITY, the ATS authorities operating the NIAMEY ACC will activate the contingency procedures in accordance with THIS PLAN (Where it also serves as the formal LOA);
- d) Prior to entry to the OUAGADOUGOU UTA during contingency operations, authorization must be obtained from BURKINA FASO Civil Aviation Authority, and flights must comply with the ATC clearance and communications instructions issued by the ACC responsible for the airspace immediately adjacent to the OUAGADOUGOU UTA contingency airspace;
- e) Coordination of aircraft boundary estimates and flight levels by the adjacent ACC responsible for aircraft entering the OUAGADOUGOU UTA shall be in accordance with THIS PLAN (Where it also serves as the formal LOA);
- f) The ACC responsible for aircraft entering the OUAGADOUGOU UTA will instruct pilots to maintain the last flight level assigned and speed (Mach number if applicable) while operating in the OUAGADOUGOU UTA;

- g) The ACC responsible for aircraft entering the OUAGADOUGOU UTA will not authorize any change in route, flight level or speed unless specifically authorized by the ATS unit normally responsible for the affected airspace, or under THIS PLAN (Where it also serves as the formal LOA);
- h) The ACC responsible for aircraft entering the OUAGADOUGOU UTA will inform aircraft that they must establish prior contact with the first ATS UNIT after transiting the OUAGADOUGOU UTA not less than 10 minutes before the estimated time of entry to the airspace which this Unit is responsible;

**5. TRANSITION TO CONTINGENCY SCHEME**

During times of uncertainty when disruption of air traffic services seems possible, aircraft operators should be prepared for a possible change in routing while en-route, familiarization of the alternative routes outlined in the contingency scheme as well as what may be promulgated by BURKINA FASO Civil Aviation Authority via NOTAM.

In the event of a disruption of air traffic services that has not been promulgated, OUAGADOUGOU ACC will, if possible, broadcast to all aircraft in the OUAGADOUGOU CTA/ UTA, airspace that is affected by the disruption and any further instructions.

It is recognized that when a disruption of air traffic services or airport closure occurs and is promulgated, operators may have different requirements as to their alternative routings.

OUAGADOUGOU ACC will evaluate all requests to ensure safety is maintained.

**6. TRANSFER OF CONTROL, COORDINATION AND DELEGATION OF RESPONSIBILITY IN THE PROVISION OF AIR TRAFFIC SERVICES WITHIN THE OUAGADOUGOU UTA**

6.1 The transfer of control and communication will be at the common OUAGADOUGOU ACC boundaries or as previously agreed upon between:

- a) NIAMEY ACC;
- b) ACCRA ACC;
- c) ABIDJAN ACC;
- d) BAMAKO ACC

6.2 The responsibility for ensuring the provision of air traffic services within OUAGADOUGOU UTA is transferred to NIAMEY ACC according to the following considerations:

NIAMEY ACC will ensure the provision of air traffic services for traffic operating along contingency ATS routes.

HF frequencies of NIAMEY ACC (8903-3419) will be used.

**7. CONTINGENCY ATS ROUTES NETWORK**

In the event of disruption of air traffic services within OUAGADOUGOU UTA, aircraft operators should file flight plans using alternative contingency routes listed in the scheme below:

Note: ATS routes not included in the table below are temporarily unavailable.

| Contingency routes     | Delegated centers | Means of communication | Flight levels assignment   | Entering/Exit point | Adjacent FIR      |
|------------------------|-------------------|------------------------|--|---------------------|-------------------|
| UG854 (DEKAS-OG)       | NIAMEY            | VHF,CPDLC, HF          | EASTBOUND: FL270<br>WESTBOUND: FL 260 ; FL300  | DEKAS               | NIAMEY            |
| UG859 (OG-TUMUT)       | NIAMEY/ACCRA      | VHF,CPDLC, HF          | Northbound:<br>FL250 ; 310 ; 330 ; 350<br>Southbound:<br>FL280 ; 320 ; 360 ; 380 ; 400 | EPEPO/TUMUT         | NIAMEY            |
| UG860 (OG-EDGIB)       | NIAMEY/BAMAKO     | VHF,CPDLC, HF          | eastbound: FL270<br>westbound:FL260; FL300   | EDGIB               | NIAMEY/<br>BAMAKO |
| UA614 (TAVOT-BIGOM)    | NIAMEY            | VHF,CPDLC, HF          | Northbound:<br>FL330 ; 350 ; 370 ; 390<br>Southbound:<br>FL320 ; 360 ; 380 ; 400       | TAVOT/BIGOM         | NIAMEY            |
| UA601 (NANGA-BD-EBSUD) | BAMAKO-ACCRA      | VHF,CPDLC, HF          | West bound:<br>FL 260 ; 280 ; 300 ; 340<br>Eastbound:<br>FL 270 ; 310 ; 410            | NANGA/EBSUD         | ACCRA/<br>BAMAKO  |

**8. PILOT AND OPERATOR PROCEDURES**

**8.1 Filing of flight plans**

Flight plan requirements detailed in BURKINA FASO AIP continue to be apply during Contingency operations, except where modified by the contingency ATS routes and FLAS specified by ATC and/or in NOTAM.

**8.2 Over flight approval**

Aircraft operators must obtain over-flight approval from the BURKINA FASO Civil Aviation Authority prior to operating flights through the OUAGADOUGOU UTA. During the period of activation of this Contingency Plan, NIAMEY ACC will provide normal ATC clearances for aircraft to enter the OUAGADOUGOU UTA. NIAMEY ACC is not responsible for coordination or provision of overflight clearances for the OUAGADOUGOU UTA. The operator must ensure any required overflight approval has been obtained.

**8.3 Pilots operating procedures**

All aircraft transiting through OUAGADOUGOU UTA shall strictly comply with the following:

- a) Maintain contact with NIAMEY ACC according to the paragraph 4 of this contingency plan.
- b) Operate along or as close as possible to the centerline of the assigned contingency air traffic route.
- c) Reach the flight level assigned by the adjacent ACC for the transit of OUAGADOUGOU UTA at least ten (10) minutes before entering OUAGADOUGOU UTA.
- d) Maintain the flight level assigned by the last adjacent ACC while operating within OUAGADOUGOU UTA, unless an emergency or flight safety reason exists.
- e) Maintain a continuous listening watch on the VHF frequency 126.9 MHz, and transmit blind in English on 126.9 MHz position reports five (5) minutes before and overhead each compulsory reporting point established along the respective air traffic route.
- f) Include in their last position report to the competent adjacent ACC the estimated time of arrival over the entry and exit points of OUAGADOUGOU UTA.
- g) Whenever emergencies and/or flight safety reasons make it impossible to maintain the flight level assigned for the transit of OUAGADOUGOU UTA, climb or descend well to the right of the centerline of the air traffic route being flown but remaining within OUAGADOUGOU UTA, and to inform immediately, by blind broadcast on the VHF frequency 126.9 MHz, all other aircraft likely to be affected by transmitting a relevant emergency level change message (comprising the aircraft callsign, the aircraft position, the flight levels being left and crossed, etc.).
- h) Contact the competent adjacent ACC as soon as possible and at least ten (10) minutes before the estimated time of arrival over the relevant exit point of OUAGADOUGOU UTA to obtain clearance for entering the adjacent airspace concerned.
- i) Display navigation and anti-collision lights always during the transit of contingency airspace.
- j) The application of SLOP is strongly encouraged
- k) Transponders should be set on a discrete code assigned by ATC or select code A2000 if ATC has not assigned a code.

## COMMUNICATION PROCEDURES

### 8.4 Degradation of Communication - Pilot Radio Procedures

8.4.1 When operating within the contingency airspace, pilots should use normal radio communication procedures. (Where limited or not ATS is available communications will be conducted in accordance with the procedures in the Plan, or as otherwise notified by NOTAM)

8.4.2 In the absence of communication with ATC, the pilot should continue to make routine position reports on the assigned frequency and also broadcast positions in accordance with the TIBA procedures.

## 9. PUBLIC HEALTH EMERGENCIES

9.1 The delegated ATS unit, upon receipt of information from a pilot or another ATS unit, regarding suspected case(s) of communicable disease, or other public health risk, on board the aircraft, shall forward a message as soon as possible to the ATS unit serving the destination / departure, unless procedures exist to notify the appropriate authority designated by the State and the aircraft operator or its designated representative.

9.2 To avoid misunderstanding that may result in inappropriate reaction from the stakeholders including air operators, information provided by the Health Sanitary Board (HSB) should be obtained in written form and relayed to air operators in written form. Where communication means do not enable relay of written text, the information shall be read verbatim.

## 10. VOLCANIC ASH CONTINGENCY PLAN (VACP)

10.1 If a volcanic ash cloud is reported or anticipated in OUAGADOUGOU UTA, the delegated ATS unit should take the following actions:

- a) Immediately transmit relevant information to the flight crews of potentially affected aircraft to ensure that they are aware of the current position and expected position of the cloud and the concerned flight levels;
- b) Respond to requests for a course change or a level change as far as possible;
- c) Propose a route change to avoid or leave the reported or predicted areas of presence of the volcanic ash cloud when requested by the pilot or as the controller deems it necessary; and
- d) Where possible, request a special flight report when the flight route enters or anticipates the planned volcanic ash cloud and transmit the report to the appropriate agencies.

10.2 When a flight crew informs the delegated ATS unit that they have inadvertently entered a cloud of volcanic ash, the delegated ATS units should:

- a) Respect measures applicable to an aircraft in an emergency, and;
- b) Alter the assigned route or level only if the pilot requests so or if the airspace or traffic conditions require it.

## 11. Interception of civil aircraft

11.1 Pilots need to be aware that in light of current international circumstances, a contingency routing requiring aircraft to operate off of normal traffic flows, could result in an intercept by military aircraft. Aircraft operators must therefore be familiar with international intercept procedures contained in ICAO Annex 2- Rules of the Air, Paragraph 3.8 and Appendix 2, Sections 2 and 3.

11.2 Pilots need to continuously listen out on the VHF emergency frequency 121.5MHz and should operate their transponders always during flight, regardless of whether the aircraft is within or outside airspace where secondary surveillance radar (SSR) is used for ATS purposes. Transponders should be set on a discreet code assigned by ATC or select code A2000 if ATC has not assigned a code.

11.3 If an aircraft is intercepted by another aircraft, the pilot shall immediately:

- \* Follow the instructions given by the intercepting aircraft, interpreting and responding to visual signals in accordance with international procedures;
- \* If possible, notify to ATS Unit;
- \* Set transponder code to A7700, unless otherwise instructed by the appropriate ATS unit;
- \* Attempt to establish radio communication with the intercepting aircraft by making a general call on the emergency frequency 121.5MHz; and
- \* If instructions are received by radio from any source that conflict with those given by the intercepting aircraft, the intercepted aircraft, shall request immediate clarification while continuing to comply with the instructions given by the intercepting aircraft.

## 12. SEARCH AND RESCUE

12.1 The delegated ATS unit involved in this contingency plan is required to assist any distressed aircraft of which they are aware and which flies over a contingency space.

12.2 The center that receives a distress message from an aircraft shall send the necessary messages (INCERFA, ALERFA or DETRESFA) to all authorities in the SAR service involved in this plan including the SAR authority of the center which is in contingency situation.

12.3 Each SAR authority shall assist as necessary its neighbor as requested in their LOA.

Contact details of its SAR Authority are provided in paragraph 15.3 below.

## 13. PLAN TESTING AND REVIEW

13.1 The Plan shall be tested by ATC simulation at least once per year.

13.2 A full review shall be conducted at least once per three years.

## 14. IMPLEMENTATION OF THE PLAN

The provisions of this contingency Plan shall be promulgated by NOTAM to be issued by BURKINA FASO Civil Aviation Authority in coordination with ICAO and the concerned States.

## 15. ALL CONTINGENCIES UNITS

### 15.1 CENTRAL COORDINATING COMMITTEE

**PART II: LEVEL 3 CONTINGENCY (REQUIRING AVOIDANCE OF AFFECTED AIRSPACE)****UNAVAILABILITY OF OUAGADOUGOU UTA****OBJECTIVES**

In the event that the total disruption of Air Traffic Services (ATS) within OUAGADOUGOU UTA does not allow flying in the airspace affected, users are invited to circumvent the airspace.

Users may also choose to avoid the OUAGADOUGOU UTA by flight planning via any alternative ATS routes provided by neighboring ATS unit of OUAGADOUGOU ACC.

Users are advised to circumnavigate OUAGADOUGOU UTA and try to establish contact with the ATS unit responsible for the provision of service as soon as possible.

## ENR 1 RÈGLES ET PROCÉDURES GÉNÉRALES GENERAL RULES AND PROCEDURES

### ENR 1.1 PROCÉDURES À SUIVRE POUR LES PILOTES EXPOSÉS AU LASER ET À D'AUTRES SOURCES LUMINEUSES DIRIGÉES À FORTE INTENSITÉ PILOTS PROCEDURES FOR EXPOSURE TO LASER AND OTHER DIRECTED BRIGHT LIGHT SOURCES

#### 1. Objet

Le présent document renferme des renseignements et des directives à l'intention des membres d'équipage de conduite susceptibles d'être exposés, en vol, à des faisceaux laser ou à d'autres sources de lumières dirigées à forte intensité. Il contient également un formulaire que les pilotes doivent remplir pour signaler tout incident lié à l'exposition à un faisceau de lumière dirigée à forte intensité.

#### 2. Contexte

Les sources de lumière dirigée à forte intensité qui émettent à proximité d'un aéroport ou dans tout espace aérien navigable peuvent perturber les manoeuvres des pilotages, voire causer des lésions oculaires chez les pilotes, les membres d'équipage et les passagers.

#### 3. Définitions

##### **Aveuglement par l'éclair :**

Perturbation temporaire de la vision, subséquente à une exposition à une source de lumière à forte intensité, qui altère la capacité de repérer ou de distinguer clairement une cible visuelle.

##### **Éblouissement :**

État d'aveuglement total ou partiel résultant de la présence d'une source de lumière à forte intensité dans le champ de vision central (comparable à la lumière diffusée par les phares d'une voiture roulant en sens inverse). Le phénomène ne dure que pendant que la source lumineuse est présente dans le champ de vision du sujet exposé. La lumière laser visible peut causer un éblouissement et altérer la vision, et ce, à une intensité bien inférieure à celle susceptible de causer des lésions oculaires.

##### **Images rémanentes :**

Tâches lumineuses, sombres ou colorées pouvant persister plusieurs minutes, qui sont perçues à la suite d'une exposition à une source de lumière à forte intensité et qui peuvent être source de distraction ou de perturbations.

##### **Laser :**

Acronyme signifiant "amplification de la lumière par émission stimulée de radiation" et qui désigne un dispositif générant un intense faisceau de lumière cohérent et dirigé.

##### **Saisissement :**

Émotion brusque et soudaine provoquée par un événement inattendu ou la peur, qui peut avoir des effets psychologiques ou physiologiques néfastes.

##### **Source de lumière dirigée à forte intensité :**

Tout dispositif capable d'émettre un faisceau lumineux à haute intensité comme un laser, un phare de recherche, un projecteur ou un appareil de projection.

#### 4. Analyse

#### 1. Purpose

*This document contains information and guidelines for flight crews encountering "laser illuminations" or other directed bright light sources while in flight.*

*It also contains a reporting form for pilots to report directed bright light illumination incidents*

#### 2. Background

*Directed bright light sources projected near airports or into any navigable airspace can create potential flight control disruptions and/or eye injury to pilots crew members and passengers.*

#### 3. Definitions

##### **Flash blindness :**

*A temporary vision impairment that interferes with the ability to detect or resolve a visual target following exposure to a bright light.*

##### **Glare :**

*A reduction or total loss of visibility, such as that produced by an intense light source in the central field of vision, e.g. oncoming headlights. These visual effects last only as long as the light is actually present and affecting the individual's field of vision. Visible laser light can produce glare and can interfere with vision even at low energies, including levels well below that which produce eye damage.*

##### **Afterimage :**

*The perception of light, dark or coloured spots after exposure to bright light that may be distracting and disruptive, afterimages may persist for several minutes.*

##### **Laser :**

*An acronym for "light amplification by stimulated emission of radiation". A device that produces an intense, directional, coherent beam of light.*

##### **Startle :**

*Sudden shock from surprise or alarm, which can cause an adverse psychological or physiological effect.*

##### **Directed bright light source :**

*Devices capable of emitting a beam of high intensity light, such as a laser, searchlight, spotlight or image projector.*

#### 4. Analysis

Les sources lumineuses dirigées à forte intensité, en particulier les faisceaux laser présents à proximité des aéroports ou dans tout espace aérien navigable, soulèvent deux préoccupations en matière de sécurité aérienne :

- 1- La première est liée à la possibilité qu'un faisceau de lumière dirigée à forte intensité, non susceptible de causer des lésions, pénètre accidentellement dans un poste de pilotage.  
Selon son niveau d'intensité, un tel faisceau pourrait surprendre ou éblouir un pilote et rendre difficile, voire impossible, toute observation à travers le pare-brise (aveuglement par l'éclair ou image rémanente).  
L'exposition à la source de lumière intense et l'éblouissement peuvent être de courte durée – un ou deux éclairs brefs – mais le saisissement et l'image rémanente peuvent persister pendant plusieurs secondes, voire plusieurs minutes.
- 2- La seconde préoccupation réside dans le fait qu'un faisceau laser suffisamment puissant peut causer chez la personne exposée (pilote, membre d'équipage, passager) des lésions oculaires, temporaires ou permanentes.

## 5. Procédures

### 5.1 Procédures préventives :

Cette section a pour principal objet de définir les mesures préventives et les procédures que les pilotes peuvent appliquer pour prévenir tout risque d'exposition à une source de lumière intense ou, en cas d'exposition, pour limiter les perturbations dans le poste de pilotage.

Lorsque l'aéronef doit traverser un espace aérien comportant un risque d'exposition à des faisceaux laser, les membres d'équipage de conduite doivent :

1. consulter les NOTAM pour s'informer de l'éventuelle présence de tout faisceau laser temporaire.
2. Allumer les feux extérieurs supplémentaires de l'aéronef afin que les observateurs chargés de la sécurité des installations laser au sol puissent localiser sa présence et réagir en coupant le faisceau laser,
3. Allumer l'éclairage de cockpit,
4. Embrayer le pilote automatique,
5. Assigner un autre membre d'équipage de conduite à la surveillance des instruments, afin de réduire au minimum les effets d'un éventuel faisceau laser, lorsque l'aéronef pénètre dans une zone à risque.
6. Au cours d'opérations de surveillance ou d'évacuation médicale par hélicoptère, envisager le port de lunettes à filtre coupe - bande, qui protègent contre les ondes laser de 514 à 532 nanomètres.

### 5.2 Procédures à suivre en cas d'incident lié au laser :

Tout pilote exposé à un faisceau laser doit :

1. Détourner immédiatement son regard de la source lumineuse ou tenter de se protéger les yeux avec la main ou un objet quelconque, afin d'éviter, dans la mesure du possible, d'être directement exposé au faisceau laser.
2. Informer l'autre membre d'équipage de conduite sur le-champ de la présence d'un faisceau laser et le mettre en garde contre les effets sur la vision.

*Directed bright light sources, particularly laser beams, projected near airports or into any navigable airspace can cause two flight safety concerns:*

- 1- *The primary concern is when noninjurious, bright levels of directed light unexpectedly enter the cockpit. Depending on the brightness level, the light could startle the flight crew member(s), could cause glare, making it difficult to see out the windscreen, or could even create temporary vision impairment (flash blindness and/or afterimage).*

*The illumination and glare may be short – one or a few bright flashes – but the startle and afterimage effects could persist for many seconds or even minutes.*

- 2- *The secondary concern is if a laser beam is so powerful that it causes temporary or permanent eye injury to anyone (pilots, crew members, passengers) viewing it.*

## 5. Procedures

### 5.1 Preventive procedures

*The main purpose of this section is to outline preventative measures and incident procedures pilots can follow to either prevent potential illuminations or minimize cockpit disruption if one occurs.*

*During aircraft operations into navigable airspace where laser illuminations are anticipated, flight crews should:*

1. *Consult NOTAM for temporary laser activity.*
2. *Turn on additional exterior lights to aid ground laser safety observers in locating aircraft so they are able to respond by turning off the laser beam.*
3. *Turn on cockpit lighting.*
4. *Engage the autopilot.*
5. *Have one flight crew member stay on the instruments to minimize the effects of a possible illumination while in the area of expected laser activity.*
6. *Consider using notch filter eye spectacles that protect against 514 and 532 nanometer laser wavelengths, if flying a helicopter engaged in surveillance or medical evacuation.*

### 5.2 Laser incident procedures :

*If a laser beam illuminates a pilot in flight, the pilot should :*

1. *Immediately look away from the laser source or try to shield the eyes with a hand or hand-held object to avoid, if possible, looking directly into the laser beam.*
2. *Immediately alert the other flight crew member(s) and advise them of the illumination and its effect on their vision.*

3. Si sa vision est altérée, passer immédiatement les commandes de l'appareil à l'autre membre d'équipage de conduite. Dans l'éventualité où la vision des deux membres d'équipage de conduite est atteinte, le pilote automatique doit être embrayé.
4. Être conscient des effets de désorientation spatiale (illusion d'inclinaison) et, une fois sa vision rétablie, consulter les instruments du poste de pilotage afin de vérifier l'assiette de l'aéronef.
5. Éviter de se frotter les yeux, car il risque ainsi d'aggraver toute éventuelle irritation ou lésion oculaire.
6. Prendre contact avec l'ATC et signaler la présence d'une « illumination laser (phraséologie utilisée pour signaler tout incident ou accident impliquant un laser) et, lorsque cela est justifié, déclarer une situation d'urgence.
7. Lorsqu'il dispose de suffisamment de temps, fournir à l'ATC un rapport d'incident précisant le lieu, la direction et la couleur du faisceau, ainsi que la durée de l'exposition (éclair ou poursuite intentionnelle) et ses effets sur l'équipage.

#### 5.3 Procédures après vol

Les membres d'équipage de conduite exposés à une source lumineuse dirigée à forte intensité, doivent renseigner le formulaire ci-joint et le déposer au Poste de coordination Escale (PCE) de AERIA.

Tout membre d'équipage victime d'une exposition à une lumière intense et qui présente des symptômes tels des douleurs oculaires ou des troubles de la vision (aveuglement par l'éclair ou images rémanentes), devrait consulter immédiatement un médecin.

3. *If vision is impaired, immediately transfer control of the aircraft to the other flight crew member, if both flight crew members have been illuminated, engage the autopilot, if equipped.*
4. *Be very cautious of spatial disorientation effects (the "leans "). After regaining vision, check cockpit instruments for proper flight status.*
5. *Resist the urge to rub the eyes after a laser illumination, as this action may cause further eye irritation or damage.*
6. *Contact ATC and advise of a " laser illumination". Use this terminology for all laser incident/accident reports. If the situation dictates, declare an emergency.*
7. *When time permits, provide ATC with an incident report, which would include the location, direction, beam colour, length of exposure (flash or intentional tracking), and effect on the crew.*

#### 5.3 Post-flight procedures

*Flight crew member(s) encountering a directed bright light source must fill in the attached reporting form and submit it to AERIA PCE office.*

*A crew member that has been subjected to a significant illumination causing persistent symptoms such as pain or visual abnormalities (e.g. flash blindness or afterimage), should seek immediate medical attention.*

**Compte-rendu d'incident d'exposition suspectée à un faisceau laser/  
Incident reporting - form for a suspected exposure to a laser beam**

Ce formulaire est utilisé par les pilotes pour signaler une exposition suspectée à un faisceau laser. Lorsque le formulaire aura été rempli, il devrait être communiqué dès que possible à l'ANAC et à AERIA, pour plus amples investigations/

*This form is used by pilots to report any suspected exposure to a laser beam. When the form has been completed, it should be communicated as soon as possible to ANAC and AERIA, for further investigation.*

**5. Description de la lumière / Bright Description**

Couleur / Colour :

.....  
.....

Nature du faisceau (constant, clignotant, pulsé) / Nature of the beam (constant, flashing, pulsed) :

.....  
.....

Source de la lumière (stationnaire ou mouvante) / Source of light (stationary or moving) :

.....  
.....

Croyez-vous avoir été ciblé intentionnellement ? / Do you think you have been deliberately hit ? :

.....  
.....

Intensité relative (flash, phare, soleil) / Relative intensity (flash, light, sun) :

.....

Durée de l'exposition (en secondes) / Exposure time (in seconds) :

.....

Le faisceau était-il visible avant l'incident ? / Is the beam visible before incident ? :

.....

Position de la source de lumière (par rapport à un repère géographique ou à l'aéronef) / Position of the light source (relative to a geographic reference or aircraft) :

.....

Indiquer par un cercle le pare-brise par lequel la lumière a pénétré dans le cockpit / Put in a circle the windscreen the light is coming from :

Gauche / Left Avant-gauche / Front-left Centre / Center Avant-droit / Front-right Droit / Right Autre / Other

.....  
.....

Angle de site du faisceau par rapport à l'horizontale (en degrés) /

Angle of the beam relative to the horizontal (in degrees) : .....

**6. Effets sur la personne / Effects on the person**

Décrire les effets visuels\*, psychologiques, physiques/ Describe the visual effects\*, psychological, physical :

.....  
.....

Durée des effets visuels (secondes/ minutes/heures/ jours)/ Duration of visual effects (seconds / minutes / hours / days) :

.....  
.....

Comptez-vous demander un examen médical ?/ Will you request a medical examination? : .....

Note : Cela est recommandé s'il y a eu des symptômes même mineurs/ This is recommended if there are even minor symptoms.

Effets sur les procédures opérationnelles ou en cockpit / Incidence on operational procedures or in the cockpit :

.....  
.....

.....  
.....

\* Exemples d'effets visuels courants/ Examples of common visual effects :

Aveuglement par l'éclair / Flash blindness :

Perturbation temporaire de la vision, subséquente à une exposition à une source de lumière à forte intensité, qui altère la capacité de repérer ou de distinguer clairement une cible visuelle./ A temporary vision impairment that interferes with the ability to detect or resolve a visual target following exposure to a bright light.

Éblouissement / Glare :

Etat d'aveuglement total ou partiel résultant de la présence d'une source de lumière à forte intensité dans le champ de vision central (comparable à la lumière diffusée par les phares d'une voiture roulant en sens inverse). Le phénomène ne dure que pendant que la source lumineuse est présente dans le champ de vision du sujet exposé. La lumière laser visible peut causer un éblouissement et altérer la vision, et ce, à une intensité bien inférieure à celle susceptible de causer des lésions oculaires./ A reduction or total loss of visibility, such as that produced by an intense light source in the central field of vision, e.g. oncoming headlights. These visual effects last only as long as the light is actually present and affecting the individual's field of vision. Visible laser light can produce glare and can interfere with vision even at low energies, including levels well below that which produce eye damage.

Images rémanentes / Afterimages :

Tâches lumineuses, sombres ou colorées pouvant persister plusieurs minutes, qui sont perçues à la suite d'une exposition à une source de lumière à forte intensité et qui peuvent être source de distraction ou de perturbations./ The perception of light, dark, or coloured spots after exposure to bright light that may be distracting and disruptive. Afterimages may persist for several minutes.

Secteur aveugle / Blind Area :

Perte temporaire ou permanente de vision dans une partie du champ visuel / Temporary or permanent loss of vision in one part of the visual field.

ENR 1.8  
**ATM CONTINGENCY PLAN FOR NIAMEY ACC**

**PART I: LEVEL 2 CONTINGENCY PLAN (REQUIRING INTERVENTION OF ADJACENT FIR)**

**1. OBJECTIVES**

- 1.1. This contingency plan contains arrangements to ensure the provision of air navigation in the event of partial or total disruption of Air Traffic Services (ATS) within the NIAMEY Upper Traffic Area and is in accordance with ICAO Annex 11 - Air Traffic Services Chapter 2, paragraph 2.3.2, and Attachment C and document 4444 ATM- PANS (Chapter 15.8 and chapter 16.6).
- 1.2. This Contingency Plan is designed to accommodate the flow of international air traffic with a minimum of disturbance for aircraft transiting the airspace under the responsibility of NIAMEY ACC. Routes and flight levels are limited.

**2. STATES AND FIRS AFFECTED**

- 2.1 In the event that NIAMEY ACC activates this Contingency Plan, the adjacent DAKAR and Ndjamen ACCs, will be notified in accordance with the Letter of Agreement (LOA) or Memorandum of Understanding (MOU) established between them. The adjacent ACCs directly affected by this Contingency Plan are as follows:

| STATE          | FIR         | ATS UNIT        |
|----------------|-------------|-----------------|
| Ghana          | Accra FIR   | Accra ACC       |
| Togo           | Accra FIR   | Lomé ACC        |
| Mauritania     | Dakar FIR   | Nouakchott ACC  |
| Mali           | Dakar FIR   | Bamako ACC      |
| Guinea Conakry | Roberts FIR | Roberts ACC     |
| Burkina Faso   | Niamey FIR  | Ouagadougou ACC |
| Chad           | Ndjamen FIR | Ndjamen ACC     |
| Nigeria        | Kano FIR    | Kano ACC        |

- 2.2 The contact details of the civil aviation authorities and organizations concerned are contained in PARAGRAPH 15 below.

**3. MANAGEMENT OF THE CONTINGENCY PLAN**

- 3.1 The contingency measures set out in the first part of this Plan are applicable in cases of foreseeable events is for level 2.
- 3.2 The following procedures have been put in place to ensure that the management of the Contingency Plan provides for international flights to proceed in a safe and orderly fashion through NIAMEY Upper Traffic Area.

**CENTRAL COORDINATING COMMITTEE**

- 3.3 The Central Coordinating Committee (CCC) function shall be to oversee the implementation of the Contingency Plan and in the event that the Air Traffic Services (ATS) in Niamey UTA is disrupted for an extended period, make arrangements for and facilitate the temporary relocation of the Air Traffic Services to Dakar and Ndjamen ACCs and the restoration of Air Traffic Services in Niamey UTA.

The Central Coordinating Committee comprises representation from the following:

- 1) NIGER CIVIL AVIATION AUTHORITY (ANAC-NIGER)
- 2) ASECNA (HEADQUARTER, REPRESENTATIVE AND DELEGATION IN NIGER)
- 3) OTHER RELEVANT AUTHORITIES.

Contact details of its members are provided in paragraph 15.1 below.

**ATM OPERATIONAL CONTINGENCY GROUP**

- 3.4 The ATM Operational Contingency Group (AOCG) will be convened by the CCC with a primary responsibility to oversee the day to day operations under the contingency arrangements, and coordinate operational ATS activities, 24 hours a day, throughout the contingency period in coordination with the WACAF Contingency Coordination Team and adjacent FIRs. The AOCG will include any necessary specialist personnel from the following disciplines:

- \* Air Traffic Control Services (ATS)
- \* Aeronautical Telecommunication (COM)
- \* Aeronautical Meteorology (MET)
- \* Aeronautical Information Services (AIS)
- \* ATS equipment maintenance service provider.

Contact details of its members are provided in paragraph 15.2 below.

**4. AIR TRAFFIC MANAGEMENT AND CONTINGENCY PROCEDURES**

**4.1 Air Traffic Services Responsibilities**

- 4.1.1 Tactical ATC considerations during periods of over-loading may require re-assignment of routes or portions thereof.

- 4.1.2 Alternative routes are designed to maximize the use of existing ATS route structures and communications, navigation and surveillance services.
- 4.1.3 In the event that ATS cannot be provided within Niamey UTA, ASECNA shall publish not less than 48 hours before, if practicable, the corresponding NOTAM indicating the following:
- Time and date of the beginning of the contingency measure;
  - Airspace available for landing and over flying traffic and airspace to be avoided;
  - Details of the facilities and services available or not available and any limits on ATS provision (e.g. ACC, APP, TWR and FIS), including an expected date of restoration of services if available;
  - Information on the provisions made for alternative services;
  - ATS contingency routes;
  - Procedures to be followed by adjacent ATS units;
  - Procedures to be followed by pilots; and
  - Any other details with respect to the disruption and actions being taken that aircraft operators may find useful.
- 4.1.4 In the event that the Niamey ACC is unable to issue the NOTAM, ASECNA will take action to issue the NOTAM of contingency measures upon notification by Niamey ACC.

#### 4.2 Separation

Separation criteria shall be applied in accordance with the Procedures for Air Navigation Services- Air Traffic Management (Doc 4444) and the Regional Supplementary Procedures (Doc 7030).

Longitudinal separation of fifteen (15) minutes or 20 nautical miles Radar separation, where Radar services are available for aircraft maintaining the same cruising flight level shall be applied.

#### 4.3 Level restriction

Where possible, aircraft on long haul international flights shall be given priority with respect to cruising levels.

#### 4.4 Airspace Classifications

Airspace classification will not be changed.

#### 4.5 Aircraft position reporting

4.5.1 The primary means of communication will be by VHF or HF radio. When CPDLC has been authorized for use by the relevant ATC authority this will become the primary means of communication, with HF as secondary. Traffic Information Broadcast by Aircraft (TIBA) procedures shall apply in Niamey UTA during periods of contingency.

4.5.2 TIBA frequencies shall be as follows:  
AFI REGION – 126.9 MHz.

#### 4.6 Other measures

Other measures related to the disruption of air traffic services and the implementation of the contingency scheme within the Niamey UTA may be taken as follows:

- Suspension of all VFR Operations;
- Delay or suspension of general aviation IFR operations; and;
- Delay or suspension of commercial IFR operations.

#### 4.7 Procedures for ATS Units

The ATS units providing Air traffic control services will follow their unit emergency operating procedures and activate the appropriate level of contingency procedures in line with this plan.

- ATC will inform pilots of the emergency condition and advise if it is likely that the ATS will be suspended and transmit on the radio frequency in use providing pilots with alternate means of communication;
- During the period the contingency procedures are in effect, flight plan and other aircraft movement messages must continue to be transmitted by operators to Dakar and Ndjamena ACCs via the AFTN, using normal procedures;
- On notification by Niamey ACC, the ATS authorities operating the ASECNA will activate the contingency procedures in accordance with this plan or any existing LOA or MOU.
- Prior to entry to the Niamey UTA during contingency operations prior authorization must be obtained from Dakar and Ndjamena ACCs, and flights must comply with the ATC clearance/Route/Flight level and communications instructions issued by the Dakar and Ndjamena ACCs responsible for the airspace immediately adjacent to the Niamey ACC contingency airspace.
- Coordination of aircraft boundary estimates and flight levels by the adjacent Dakar and Ndjamena ACCs responsible for aircraft entering the Niamey UTA shall be in accordance with this plan.
- Dakar and Ndjamena ACCs responsible for aircraft entering the Niamey UTA will instruct pilots to maintain the last flight level assigned and speed (MACH number if applicable) while operating in the Niamey UTA.
- Dakar and Ndjamena ACCs responsible for aircraft entering the Niamey UTA will not authorize any change in route, flight level or speed unless specifically authorized by the ATS unit normally responsible for the affected airspace, or under this plan.

- h) Dakar and Ndjamen ACCs responsible prior to aircraft entering the Niamey UTA will inform aircrafts that they must establish contact with the first ACC after transiting the Niamey UTA not less than 10 minutes before the estimated time of entry to the next adjacent airspace.

#### 5 . TRANSITION TO CONTINGENCY SCHEME

During times of uncertainty when disruption of air traffic services seems possible, aircraft operators should be prepared for a possible change in routing while en-route, familiarization of the alternative routes outlined in the contingency scheme as well as what may be promulgated by ASECNA via NOTAM or AIC.

In the event of a disruption of air traffic services that has not been promulgated, NIAMEY ACC will, if possible, broadcast to all aircraft in the NIAMEY UTA , airspace that is affected by the disruption and any further instructions.

It is recognized that when a disruption of air traffic services or airport closure occurs and is promulgated, operators may have different requirements as to their alternative routings. NIAMEY ACC will evaluate all requests to ensure safety is maintained.

#### 6 . Transfer of control, coordination and delegation of responsibility in the provision of air traffic services within the NIAMEY UTA

6.1 The transfer of control and communication will be at the common ACC boundaries or as previously agreed upon between:

- |               |   |                  |
|---------------|---|------------------|
| a) NIAMEY ACC | - | Accra ACC ;      |
| b) NIAMEY ACC | - | Alger ACC ;      |
| c) NIAMEY ACC | - | Bamako ACC ;     |
| d) NIAMEY ACC | - | Nouakchott ACC ; |
| e) NIAMEY ACC | - | Kano ACCS        |
| f) NIAMEY ACC | - | N'djamena ACC    |
| g) NIAMEY ACC | - | Lomé ACC         |
| h) NIAMEY ACC | - | Ouagadougou ACC. |

6.2 The responsibility for ensuring the provision of air traffic services within NIAMEY UTA is transferred to Dakar and N'djamena ACC s according to the following considerations:

- a) Dakar ACC will ensure the provision of air traffic services for traffic operating along contingency ATS routes west of the longitude 005°E.  
HF frequencies of Dakar (8861-3452-6673) will be used.
- b) N'djamena ACC will ensure the provision of air traffic services for traffic operating along the contingency ATS routes east of the longitude 005°E.  
HF frequencies of Ndjamen (8873-8903-13294-5493-8894) will be used.

#### 7. Contingency ATS Route Network

In the event of disruption of air traffic services within Niamey UTA, aircraft operators should file flight plans using alternative contingency routes listed in the scheme below:

Note: ATS routes not included in the table below are temporarily unavailable.

| Contingency routes               | Delegated centers | Means of communication | Flight levels assignment   | Entering/Exit point | Adjacent FIR          |
|----------------------------------|-------------------|------------------------|--|---------------------|-----------------------|
| UB730<br>(IKTAV-ENDOK-<br>RAKOM) | Ndjamena          | CPDLC, HF/<br>VHF      | Northbound: FL260; FL280;<br>FL300; FL320; FL340; FL360;<br>FL380; FL400<br>Southbound: FL250; FL270; FL290;<br>FL310;<br>FL330; FL350-FL370-<br>FL390-FL410 | IKTAV/RAKOM         | Alger                 |

## 8. PILOT AND OPERATOR PROCEDURES

### 8.1 Filing of flight plans

Flight planning requirements detailed in ASECNA AIP continue to apply during contingency operations, except where modified by the contingency ATS routes and FLAS specified by ATC and/or in NOTAM.

### 8.2 Overflight approval

Aircraft operators must obtain over-flight approval from the ANAC-NIGER prior to operating flights through the Niamey UTA. During the period of activation of this Contingency Plan, the adjacent ACC will provide normal ATC clearances for aircraft to enter the Niamey UTA. The adjacent ACC is not responsible for coordination or provision of overflight clearances for the Niamey UTA. The operator must ensure any required overflight approval has been obtained.

### 8.3 Pilots operating procedures

All aircraft transiting through Niamey UTA shall strictly comply with the following:

- Maintain contact with Dakar and Ndjamena ACCs according to the paragraph 4 of this contingency plan.
- Operate along or as close as possible to the centerline of the assigned contingency air traffic route.
- Reach the flight level assigned by Dakar and Ndjamena ACCs for the transit of Niamey UTA at least ten (10) minutes before entering Niamey UTA.
- Maintain the flight level assigned by the last adjacent ACC while operating within Niamey UTA, unless an emergency or flight safety reason exists.
- Maintain a continuous listening watch on the VHF frequency 126.9 MHz, and transmit blind in English on 126.9 MHz position reports five (5) minutes before and overhead each compulsory reporting point established along the respective air traffic route.
- Include in the last position report to the competent adjacent ACC the estimated time of arrival over the entry and exit points of Niamey UTA.
- Whenever emergencies and/or flight safety reasons make it impossible to maintain the flight level assigned for the transit of Niamey UTA, climb or descend well to the right of the centerline of the air traffic route being flown but remaining within Niamey UTA, and to inform immediately, by blind broadcast on the VHF frequency 126.9 MHz, all other aircraft likely to be affected by transmitting a relevant emergency level change message (comprising the aircraft call-sign, the aircraft position, the flight levels being left and crossed, etc.).

- h) Contact the competent adjacent ACC as soon as possible and at least ten (10) minutes before the estimated time of arrival over the relevant exit point of Niamey UTA to obtain clearance for entering the adjacent airspace concerned.
- i) Display navigation and anti-collision lights always during the transit of contingency airspace.
- j) The application of SLOP is strongly encouraged
- k) Transponders should be set on a discrete code assigned by ATC or select code A2000 if ATC has not assigned a code

#### **COMMUNICATION PROCEDURES**

#### **8.4 COMMUNICATION PROCEDURES**

- 8.4.1 When operating within the contingency airspace, pilots should use normal radio communication procedures.
- 8.4.2 In the absence of communication with ATC, the pilot should continue to make routine position reports on the assigned frequency and also broadcast positions in accordance with the TIBA procedures.

#### **9. PUBLIC HEALTH EMERGENCIES**

- 9.1 The Niamey ACC, upon receipt of information from a pilot or another ATS unit, regarding suspected case(s) of communicable disease, or other public health risk, on board the aircraft, shall forward a message as soon as possible to the ATS unit serving the destination / departure, unless procedures exist to notify the appropriate authority designated by the State and the aircraft operator or its designated representative.
- 9.2 To avoid misunderstanding that may result in inappropriate reaction from the stakeholders including air operators, information provided by the Health Sanitary Board (HSB) should be obtained in written form and relayed to air operators in written form. Where communication means do not enable relay of written text, the information shall be read verbatim.

#### **10. VOLCANIC ASH CONTINGENCY PLAN (VACP)**

- 10.1 If a volcanic ash cloud is reported or anticipated in Niamey UTA, Niamey ACC should take the following actions:
  - a) Immediately transmit relevant information to the flight crews of potentially affected aircraft to ensure that they are aware of the current position and expected position of the cloud and the concerned flight levels;
  - b) Respond to requests for a course change or a level change as far as possible;
  - c) Propose a route change to avoid or leave the reported or predicted areas of presence of the volcanic ash cloud when requested by the pilot or as the controller deems it necessary; and
  - d) Where possible, request a special flight report when the flight route enters or anticipates the planned volcanic ash cloud and transmit the report to the appropriate agencies.
- 10.2 When a flight crew informs Niamey ACC that they have inadvertently entered a cloud of volcanic ash, Niamey ACC should:
  - a) Respect measures applicable to an aircraft in an emergency, and;
  - b) Alter the assigned route or level only if the pilot requests so or if the airspace or traffic conditions require it.

#### **11. Interception of civil aircraft**

- 11.1 Pilots need to be aware that in light of current international circumstances, a contingency routing requiring aircraft to operate off of normal traffic flows, could result in an intercept by military aircraft. Aircraft operators must therefore be familiar with international intercept procedures contained in ICAO Annex 2- Rules of the Air, Paragraph 3.8 and Appendix 2, Sections 2 and 3.
- 11.2 Pilots need to continuously listen out on the VHF emergency frequency 121.5MHz and should operate their transponders always during flight, regardless of whether the aircraft is within or outside airspace where secondary surveillance radar (SSR) is used for ATS purposes. Transponders should be set on a discrete code assigned by ATC or select code A2000 if ATC has not assigned a code.
- 11.3 If an aircraft is intercepted by another aircraft, the pilot shall immediately:
  - \* Follow the instructions given by the intercepting aircraft, interpreting and responding to visual signals in accordance with international procedures;
  - \* If possible, notify to appropriate ATS Unit;
  - \* Set transponder code to 7700, unless otherwise instructed by the appropriate ATS unit;
  - \* Attempt to establish radio communication with the intercepting aircraft by making a general call on the emergency frequency 121.5MHz; and
  - \* If instructions are received by radio from any source that conflict with those given by the intercepting aircraft, the intercepted aircraft, shall request immediate clarification while continuing to comply with the instructions given by the intercepting aircraft.

#### **12. SEARCH AND RESCUE**

- 12.1 Dakar and Ndjamena ACCs involved in this contingency plan are required to assist any distressed aircraft of which they are aware and which flies over a contingency space.
- 12.2 The center that receives a distress message from an aircraft shall send the necessary messages (INCERFA, ALERFA or DETRESFA) to all authorities in the SAR service involved in this plan including the SAR authority of the center which is in contingency situation.
- 12.3 Each SAR authority shall assist as necessary its neighbor as requested in their LOA.

Contact details of its SAR Authority are provided in paragraph 15.3 below.

### 13. PLAN TESTING AND REVIEW

13.1 The plan shall be tested by ATC simulation at least once per year.

13.2 A full review shall be conducted at least once per three years.

### 14. IMPLEMENTATION OF THE PLAN

The provisions of this contingency plan shall be promulgated by NOTAM to be issued by ASECNA in coordination with ICAO and the concerned States
